Dear Sir/ Madam,

We refer to the engagement letter, wherein the Management of DIL Limited ('DIL') and Fermenta Biotech Limited ('FBL') appointed N S KUMAR & CO. ('NSK') to recommend share exchange ratio for the proposed amalgamation of FBL with DIL. FBL and DIL together hereinafter referred as the 'Companies'.

Please find enclosed the report (comprising 13 pages) detailing our recommendation of share exchange ratio for the proposed amalgamation and the assumptions used in our analysis.

This report sets out our scope of work, background, procedures performed by us, source of information and our opinion on the share exchange ratio.

SCOPE AND PURPOSE OF THIS REPORT

DIL Limited ('DIL') is a public company incorporated under the provisions of the Companies Act, 1913. DIL owns a few immovable properties and earns rental income from it; DIL has also made investments in some companies.

Fermenta Biotech Limited ('FBL') is engaged in manufacturing and marketing of chemicals, bulk drugs, enzymes and pharmaceutical formulations.

The Management of DIL and FBL (together referred to as the 'Management') are contemplating the amalgamation of FBL (referred to as 'transferor company') with DIL ('transferee company') ('Transaction') through a Scheme of Amalgamation and Arrangement pursuant to the provisions of Section 230 to 232 and other applicable provisions of the Companies Act, 2013 ('Scheme') and SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. As per the scheme of amalgamation and arrangement, under the proposed transaction, the equity shareholders of FBL will receive equity shares of DIL.

In connection with the proposed amalgamation, the Management has appointed N S KUMAR & CO. ('NSK') to submit a report recommending a fair share exchange ratio for issue of equity shares of DIL to the shareholders of FBL for the proposed transaction to be placed before the

respective Board of Directors. Further, we understand that DIL would be submitting the report to BSE, SEBI and other Indian regulatory authorities, as required for the Transaction. The proposed appointed date for the amalgamation is 1 April 2018, hence the Management has requested NSK to determine the exchange ratio as at 1 April 2018 ('Valuation Date').

The scope of our service is to conduct a relative valuation exercise as at the Valuation Date to determine the value of the companies using internationally accepted valuation methodologies as may be applicable to the subject companies being valued and arrive at a share exchange ratio and report on the same in accordance with generally accepted professional standards.

We must emphasize that since DIL is a company that primarily holds assets including immovable properties and investment in shares of various companies including FBL, we have fair valued such assets for the purpose of our analysis. For fair valuation of immovable properties, we have entirely relied on the valuation report issued by the technical valuers TrueVal Advisors and Harshad Ruparel. We have limited our analysis to validating the assumptions used based on publicly available market information and ratio analysis. There

are certain immovable properties held in trust by the Directors on behalf of DIL, we have considered the fair value of such immovable properties for our analysis.

Further, FBL has issued certain shares to the FBL ESOP Trust for which the consideration is yet to be received by FBL. We have considered these shares as outstanding for the purpose of our analysis.

We must emphasize that realization of free cash flow forecast used in the analysis will be dependent on the continuing validity of assumptions on which they are based. Our analysis therefore, will not, and cannot be directed to providing any assurance about the achievability of the final projections. Since the financial forecasts relate to the future, actual results are likely to be different from the projected results because events and circumstances do not occur as expected, and the differences could be material. To the extent that our conclusions are based on the forecasts, we express no opinion on achievability of those forecasts. The fact that we have considered the projections in this valuation exercise should not be construed or taken as our being associated with or a party to such projections.

VALUATION APPROACH AND METHODOLOGY OF SHARE EXCHANGE RATIO

It should be understood that the valuation of any company or its assets is inherently subjective and is subject to certain uncertainties and contingencies, all of which are difficult to predict and are beyond our control. In performing our analysis, we made numerous assumptions with respect to the industry performance and general business and economic conditions, many of which are beyond the control of the companies.

Arriving at the fair share exchange ratio for the proposed amalgamation of FBL with DIL would require determining the fair value of equity shares of DIL in terms of the fair value of equity shares of FBL as at the Valuation Date. These values are to be determined independently but on a relative basis, and without considering the effect of the proposed amalgamation.

The application of any particular method of valuation depends on the purpose for which the valuation is done. Although, different values may exist for different purpose, it cannot be too strongly emphasized that a valuer can only arrive at one value for one purpose. Our choice of methodology of valuation has been arrived at using usual and conventional methodologies adopted for transactions of similar nature and our reasonable judgment, in an independent and bona fide manner based on our previous experience of assignments of a similar nature.

The following are commonly used and accepted methods for determining the value of the equity shares of a company/ business:

1. Asset Approach – Net Asset Value method
2. Market Approach:
 - a) Market Price method
 - b) Comparable Companies Market Multiple method
3. Income Approach – Discounted Cash Flow method

For the proposed amalgamation, we have considered the following commonly used and accepted methods for determining the fair share exchange ratio, to the extent relevant and applicable:

1. Asset Approach – Net Asset Value method ('NAV')

The asset based value analysis technique is based on the value of the underlying net assets of the business, either on a book value basis or realizable value basis or replacement cost basis. This value analysis approach is mainly used in case where the firm is to be liquidated i.e. it does not meet the "going concern" criteria or in case where the asset base dominate earnings capability. It is also used where the main strength of the business is its asset backing rather than its capacity or potential to earn profits.

We have used the NAV method to value DIL as the major assets held by them include immovable properties and investment in equity shares of listed and unlisted companies

including FBL. Given that the company derives its major value from the assets held by it including the value of its investment in FBL, we have used NAV method to value DIL.

For valuing investment in companies and immovable properties we have replaced the book values of investments and immovable properties by its estimated fair value and for valuing the other assets and liabilities we have considered the book value as at 31 March 2018 to be representative of its fair value.

Given that FBL is a profitable company and is expected to continue to earn profits in the near future and would therefore be considered as a 'going concern', we have not used the NAV method to value FBL.

2. Market Approach

a) Market Price method:

The market price of an equity share as quoted on a stock exchange is normally considered as the value of the equity shares of that company where such quotations are arising from the shares being regularly and freely traded in, subject to the element of speculative support that may be inbuilt in the value of the shares. But there could be situations where the value of the shares as quoted on the stock market would not be regarded as a proper index of the fair value of the share, especially where the market values are fluctuating in a volatile capital market.

Since, DIL is a listed company, it is governed by the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2009 as amended from time to time ('ICDR Regulations'). Under the ICDR Regulations, issuance of shares pursuant to order under Sections 230 to 232 of Companies Act, 2013, is required to follow pricing conditions that apply to the preferential issue, if such issue is to be made to shareholders of an unlisted company. These guidelines prescribe the minimum price at which the shares are to be issued and we have given due consideration to this requirement.

After analyzing the market movement of the share prices and the levels of volumes traded we concluded to assign NIL weight to the market price method in case of DIL for the following reasons:

- a) Shares of DIL are thinly traded with the average daily traded volumes over the last twenty-six weeks being less than 3,600 equity shares.
- b) Secondly, shares of DIL have recently been placed under the Additional Surveillance Measures framework by BSE which has resulted in the share price of DIL fluctuating significantly with the share price hitting circuit filters on a regular basis.

Given the above reasons we believe that the current market price of DIL equity shares do not adequately reflect its fair value and have therefore not considered the market price method for the purpose of our analysis.

FBL is an unlisted company and we have therefore not used the market price method to value FBL.

b) Comparable Companies Multiple ('CCM') / Comparable Transaction Multiple ('CTM')

Under CCM, the value of shares/ business of a company is determined based on market multiples of publicly traded comparable companies. This valuation is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. CCM applies multiples derived from similar or 'comparable' publicly traded companies to a company's operating metrics. The appropriate multiple is generally based on the performance of listed companies with similar business models and size.

Under CTM, the value of shares/ business of a company is determined based on market multiples of publicly disclosed transactions in the similar space as that of the subject company. Multiples are generally based on data from recent transactions in a comparable sector, but with appropriate adjustment after consideration has been given to the specific characteristics of the business being valued.

We have not used CCM/ CTM for valuing the equity shares of either Companies, as there are no comparable listed companies operating in similar line of business and having similar business model in India.

3. Income Approach – Discounted Cash Flow Method

DCF method values a business based upon the available cash flow a prudent investor would expect the subject business to generate over a given period of time. This method is used to determine the present value of a business on a going concern assumption and recognizes the time value of money by discounting the free cash flows for the explicit forecast period and the perpetuity value at an appropriate discount factor. Free cash flows are the cash flows expected to be generated by the company that are available to equity shareholders of the company. The terminal value represents the total value of the available cash flow for all periods subsequent to the forecast period. The terminal value of the business at the end of the forecast period is estimated and discounted to its equivalent present value and added to the present value of the explicit forecast period cash flow to estimate the value of the business.

The projected free cash flows to equity shareholders over the explicit forecast period and terminal value are discounted using the Cost of equity ('COE'). The sum of the discounted

Recommendation of share exchange ratio for the
proposed amalgamation of FBL with DIL

value of such free cash flows to equity is the value of the business attributable to equity shareholders.

Using the DCF analysis involves determining the following:

Estimating future cash flows:

Free cash flows are the cash flows expected to be generated by the company that are available to equity shareholders of the company.

Appropriate discount rate to be applied to cash flows i.e. the cost of equity

This discount rate, which is applied to the free cash flows, should reflect the opportunity cost to equity shareholders. The opportunity cost of equity capital providers equals the rate of return the capital provider expects to earn on other investments of equivalent risk.

To arrive at the total value attributable to the equity shareholders of the business, value arrived through DCF method for the company is adjusted for the value of loans, excess cash, inflow on exercise of options, non-operating assets/ liabilities (e.g. fair value of investments, any contingent liabilities, etc.). The total value for equity shareholders is then divided by the total number of equity shares (on fully diluted basis) to arrive at the value per share of the business.

For the purpose of DCF value analysis, the free cash flows are based on projections and other information that are provided by the management of the company.

In case of FBL, we have used the financial projections as provided by the Management of FBL for the five-year period from FY19 to FY23 for the valuation of FBL under DCF method. We did not carry out any validation procedures or due diligence with respect to the information provided/ extracted or carry out any verification of the assets or comment on the achievability of the assumptions underlying the financial projections, save for satisfying ourselves to the extent possible that they are consistent with other information provided to us during the course of this engagement.

In case of DIL, given that it is an asset heavy company, we have not used the income approach to value it.

MAJOR FACTORS THAT WERE CONSIDERED DURING VALUATION

- The trends in the Vitamin D3 feed prices including the recent spurt in prices and the estimated long term price of the same going forward
- Improvement in margins of FBL on account of the various cost optimization programs being undertaken by the Management of FBL.
- In case of DIL, volatility in its share prices and lack of adequate trades on BSE

RECOMMENDATION OF THE RATIO OF SHARE EXCHANGE FOR THE PROPOSED AMALGAMATION

The fair exchange ratio has been arrived at on the basis of a relative equity valuation of the Companies for the proposed amalgamation based on the various methodologies mentioned herein earlier. Suitable rounding off have been carried out wherever necessary to arrive at the fair value/ exchange ratio.

In light of the above and on a consideration of all the relevant factors and circumstances as discussed and outlined herein above we recommend the share exchange ratio as follows:

100 equity shares of **DIL** of INR 10 each fully paid up for every **1,006** equity shares of **FBL** of INR 10 each fully paid up.

SHARE EXCHANGE RATIO IN CASE THE RECOMMENDED SPLIT AND BONUS ISSUE APPROVED

Further, we were informed that the Board of Directors of DIL have in its board meeting held on 18 June 2018, subject to the approval of the shareholders, recommended a split/ sub division of equity shares of DIL from a face value of INR 10 each to face value of INR 5 each. The Board has also recommended, subject to shareholder approval issue of bonus shares in the proportion of 1:1 i.e. 1 (one) fully paid equity shares of INR 5 each for every 1 (one) existing fully paid up equity shares of INR 5 each held by the members.

Should both the above proposals be approved by the shareholders prior to the approval of the scheme the recommended share exchange ratio would stand revised as under:

100 equity shares of **DIL** of INR 5 each fully paid up for every **251** equity shares of **FBL** of INR 10 each fully paid up.

Sources of Information:

For arriving at the Fairness Opinion set forth below, we have relied upon the following sources of information:

- Valuation Report by N S Kumar & Co. Chartered Accountants dated 21st June 2018
- Audited financials of DIL & FBL for the year ended 31st March 2018 and 31st March 2017
- Unaudited financial statements for the year ended 31st March 2018 of Aegean Properties Limited
- Audited financial statements for the year ended March 2017 of associates and joint venture companies
- Valuation reports for the immovable properties held by DIL and its subsidiaries issued by TrueVal Advisors dated 05 May 2018 and Harshad Ruparel dated 18 February 2018
- Projected Financials for the five year period from financial year 2019 to 2023 of FBL
- Shareholding pattern of DIL and FBL as at 31st March 2018
- Draft Scheme of Amalgamation
- Other relevant information/documents regarding FBL & DIL including information available through public domain

In addition to the above, we have also obtained such other information and explanations, which were considered relevant for the purpose of our Analysis.

Our Recommendation:

As stated in the Valuation Report by N S Kumar & Co. Chartered Accountants, they have recommended the following:

"100 equity shared of DIL of INR 10 each fully paid up for every 1,006 equity shares of FBL of INR 10 each fully paid up".

SHARE EXCHANGE RATIO IN CASE THE RECOMMENDED SPLIT AND BONUS ISSUE APPROVED

Further, we were given to understand that the Board of Directors of DIL have in its board meeting held on 18 June 2018, subject to the approval of the shareholders, recommended a split/ sub division of equity shares of DIL from a face value of INR 10 each to face value of INR 5 each. The Board has also recommended, subject to shareholder approval issue of bonus shares in the proportion of 1:1 i.e. 1 (one) fully paid equity shares of INR 5 each for every 1 (one) existing fully paid up equity shares of INR 5 each held by the members.

Should both the above proposals be approved by the shareholders the recommended share exchange ratio would be revised as under:

"100 equity shares of DIL of INR 5 each fully paid up for every 251 equity shares of FBL of INR 10 each fully paid up".

5. The Scheme, amongst others, contemplates the following arrangement:
 - (a) Upon coming into effect of this Scheme and its consideration thereof, the DIL shall without any further application, act or deed, issue and allot (‘Share Exchange Ratio’), subject to the provisions of the sub-clause 2 given below:

“100 (Hundred) equity shares of INR. 10/- (Rupees Ten only) each credited as fully paid-up of the Transferee Company for every 1006 (One Thousand Six) equity shares of INR. 10/- (Rupees Ten only) held in the Transferor Company and whose names are recorded in the register of members on the Record Date.”
 - (b) Subject to members’ approval, the Board of directors of DIL at its meeting held on June 18, 2018 approved: (a) split/sub division of share from face value of INR. 10/- each to face value of INR. 5/- each; and (b) issue of bonus equity shares in the proportion of 1:1, having face value of INR. 5/- each.  - (d) Improved organizational capability and leadership, arising from the pooling of human capital having diverse skills, talent and vast experience to compete successfully in an increasingly competitive industry;
 - (e) Cost savings are expected to flow from more focused operational efforts, rationalization, standardisation and simplification of business processes, and the elimination of duplication, and rationalization of administrative expenses;
 - (f) Reduction in the multiplicity of legal and regulatory compliances required at present to be separately carried out by the Transferor Company and the Transferee Company;
 - (g) To optimally leverage the larger assets base and cash flow of the amalgamated entity;
 - (h) Amalgamation will result in the Transferee Company directly controlling and managing the business of Transferor Company which would lead to simplification of the shareholding structure and reduction of shareholding tiers; and
 - (i) To meet the covenants for taking loan facility and to avail the incentivised reduction in the interest rates from lenders in respect of the borrowing of the Transferor and Transferee Companies.
7. Under the Scheme, there is no arrangement with the creditors, either secured or unsecured of DIL. No compromise is offered under the Scheme to any of the creditors of DIL. The liability of the creditors of DIL, under the Scheme, is neither being reduced nor being extinguished.
